Aspect Development Announces Summit 2000 Executive Conference On Inbound
   Supply Chain Management and eProcurement
PR NEWSWIRE
September 30, 1999
JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 787

     More Than One Thousand Executives Expected at Annual Event, April 16 -
19, 2000 in Scottsdale, Arizona
     MOUNTAIN VIEW, Calif., Sept. 30 /PRNewswire/ -- Aspect Development,
Inc., (Nasdaq: ASDV), today announced its plans for the company's annual
conference on Inbound Supply Chain Management, Aspect Summit 2000. Aspect's
Summit is the world's leading forum on the new management practice of
Inbound Supply Chain Management, including executive case studies from
industry leaders, and an overview of the latest Web-based product
development and eProcurement technologies, as well as B2B
e-Commerce portals for this industry. The North American Aspect Summit 2000
is scheduled for April 16-19, 2000 at the Scottsdale Princess in
Scottsdale, Arizona.
     The attendees will include executives from Aspect customer and partner
companies, and from companies evaluating Inbound Supply Chain Management
solutions for production or direct materials (Component and
Supplier Management), for non-production/MRO or indirect materials
(eProcurement), and both direct and indirect materials (eCommerce portals).
Technology experts, industry analysts, academics and journalists will also
attend.
     "Companies today are realizing that the inbound portion of their
supply chain -- where the goods and services are selected and procured for
use in product development and plant operations -- incur
significant, avoidable costs. Those companies who learn how to effectively
streamline their inbound supply will impact their overall profitability,"
stated Romesh Wadhwani, Aspect chairman and CEO. "We were very pleased with

ABSTRACT: Software vendors are coming up with a number of ingenious ways to
get information from the World Wide Web. In the advanced
supervisory-control application space, Gensym Corp. has introduced G2
WebMiner, which accesses Web sites using Hypertext Transfer Protocol.
Software vendor CADIS introduced Krakatoa, a Web browser application for
rapid access to data published using its content management software.
National Semiconductor's use of Krakatoa has resulted in a dramatic
increase in its Web traffic. Information Handling Service Group announced
that it would use Krakatoa in making its collection of technical reference
data available over the Web. Another search and classification system for
the Web, from Aspect Development, compares and selects
